## Use technology responsibly

- ✓ Keep your antivirus up to date.  
If you use McAfee, updates occur automatically.
- ✓ Use the Internet responsibly and in moderation.
- ✓ Respect all ICT policies  
(available on the ICTS website).
- ✓ Obey all student computing lab rules.
- ✗ Don't share your username or password.
- ✗ Don't use the Internet for anything illegal  
(streaming, sharing, downloading  
copyrighted content, etc).
- ✗ Don't connect too many devices to the WiFi.  
The more you use, the slower the connection  
for you and everyone around you.
